

Artur Havryk

252 × 54

Frontend Developer

+38 (066) 654 28 39 galles-dev.vercel.app agavrik464@gmail.com Telegram LinkedIn GitHub

Frontend developer with 1.5 years of commercial experience turning Figma designs into pixel-perfect, responsive WordPress and Shopify sites with green PageSpeed scores. In my own projects I build with Next.js, React and TypeScript: animated marketing sites, and apps on Supabase with AI features via the Gemini API.

Experience

Frontend Developer, Mkey Media

June 2025 – Present

Web studio. Client names are under NDA.

- Built about 15 WordPress sites from scratch based on Figma designs: custom themes, ACF, WooCommerce, plugins.
- Built 5 Shopify stores: custom Liquid themes and sections, app integration and customization.
- Delivered sites score green in Google PageSpeed; responsive and cross-browser layouts.
- Projects from one day to one month long: setup, migration and ongoing support.
- One commercial Next.js project with server-side rendering and API integration.

Chemistry and Mathematics Tutor, Nova School

July 2024 – Present

- Individual lessons in mathematics (algebra, geometry) and chemistry.
- Explaining complex topics in a clear and accessible way.
- Preparing students for tests and exams; adapting the curriculum to each student's level.

Sales Manager, "Ankor-Teploenergo"

July 2023 – Feb 2025

- Customer communication, lead generation and managing the client base.

Projects

AXIS

Live site Code

Next.js 16, React 19, TypeScript, CSS Modules, Motion, Lenis, Swiper

Multi-page website for a modular architecture studio: animated preloader, scroll-driven animations with smooth scrolling, Swiper galleries and dynamic project pages on the App Router. All styles written by hand, no UI kit.

SnapChef

Live site

Next.js, TypeScript, Supabase, Gemini API

Recipe app: take a photo of a recipe and the app reads it with the Gemini API and saves it in a clean, structured form. Database and auth on Supabase, a fast and simple interface.

Motion

Live site

Next.js, TypeScript, Supabase

Personal web app that brings work and daily tasks into one place, from development to tutoring. I designed the data model, connected the frontend to Supabase and work with real user data.

Skills

Core
HTML, CSS, SCSS, JavaScript, TypeScript, React, Redux, Next.js, Tailwind CSS

CMS and e-commerce
WordPress, ACF, WooCommerce, Shopify, Liquid

Animation
Motion, Lenis, Swiper

Tools
Figma, Git, Vite, REST API, Supabase

AI
Claude Code, ChatGPT, Gemini API

Languages

English, Upper-Intermediate
Ukrainian, native

Education

GoIT, Fullstack Developer
2024 – 2025
Team lead on a group project: planned tasks and coordinated the team.

National Technical University "Kharkiv Polytechnic Institute"
Bachelor's in Electrochemistry, 2020 – 2025
Master's in Electrochemistry, 2025 – present
